Bejucal
Guanabacoa
Güines
Madruga

Supports:

Who participates?

PROSAM is a project of the Ministry of Agriculture that is implemented under the responsibility of the Soils Institute and is accompanied by:

- Municipal Agricultural Delegations of MINAG in the selected municipalities
- Business Groups of Logistics of MINAG
- Municipal Dependencies of the Ministry of Science, Technology and Environment
- Institute of Fundamental Research in Tropical Agriculture "Alejandro de Humbold"
- Agricultural Engineering Research Institute
- National Institute of Agroforestry Research
- Cuban Association of Agricultural and Forestry Technicians
- Federation of Cuban Women
- University Centers
- PROSAM is assisted by Canadian organizations (CARE and OXFAM), selected for their experience of more than 25 years of work in Cuba, in support of food security and in the promotion of gender equality in the places where they operate.

Committed to:

1. Strengthening the capacities of the Municipal Agricultural Delegations and the Soils Institute of Cuba by:
   a) Promoting local self-supply of food with the promotion of technology and agro-ecological practices.
   b) Influencing the elaboration of agricultural production planes that incorporate the demands of the population and the interests of local producers.
2. Increasing food availability through a value chains approach where the actors and links of the chain agree and set common goals around the needs of the local population.
3. Valuing local capacities through the systematization and exchange of experiences, as well as the participation in forums and networks.

Promotes key values around:

1. Guaranteeing the full participation of women through the equal access and control of project resources with the support of the gender strategy for the agricultural system.
2. Supporting the implementation of environmental protection measures - environmental sustainability and risk reduction management.
3. Promoting an organizational culture open to interdisciplinary work, participation and the integration of actors, teamwork and participatory management.
